myGaze®

Simple yet powerful eye gaze control

myGaze Power gives people with disabilities the ability to control the PC – as they would by using the keyboard and mouse. It is an intuitive, quick and powerful way to access everything on the computer: the Internet and social media, music and video players, electronic books and games, communication software, emails, MS Office and much more. It empowers people to preserve their independence and reach their aspirations.

What's included?

myGaze n Assistive Eye Tracker

Reliable and Hi-Performing Eye Tracker.

Reliable – consistently superior performance irrespective of age, eye color and ethnicity. Product of 25 years of R&D.

Robust – far-reaching tracking range ensures optimal tracking also for children and users with positioning difficulties and involuntary movements.

Portable – slim and light aluminium design makes it an easy addition to a speech device and to a classroom.

EyeMouse Power Software

Intuitive, Powerful and Quick Windows Control.

Simple – Start Wizard helps you install and learn in just a few steps. No technical experience needed.

Powerful – complete control of all mouse and keyboard functions in any Windows program.

Intuitive – simple and quick interface, ergonomically designed for power users. Accuracy improvement just a gaze click away.

myGaze Power

Intuitive and powerful PC control

What can you do with it?

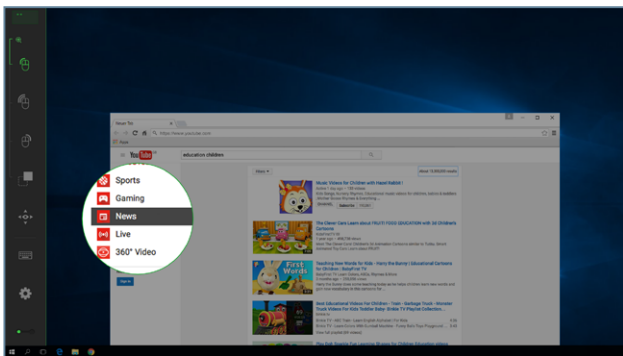

Everything you can do with a PC mouse and a keyboard. myGaze Power allows you to continue to communicate, work, socialize and have fun - despite your disability.

Communicate – use communication software, email, Skype, Facebook, Twitter and other social media to connect with people everywhere.

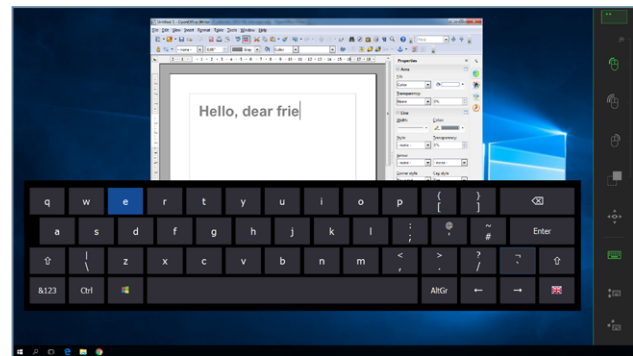

Educate – include students in the classroom by letting them make use of the same study materials as their peers, of the web browsers for research and allowing them to participate in discussions.

Work – regain your productivity and potential. Use MS Office and other professional software efficiently for your work or hobbies, such as writing, programming or designing.

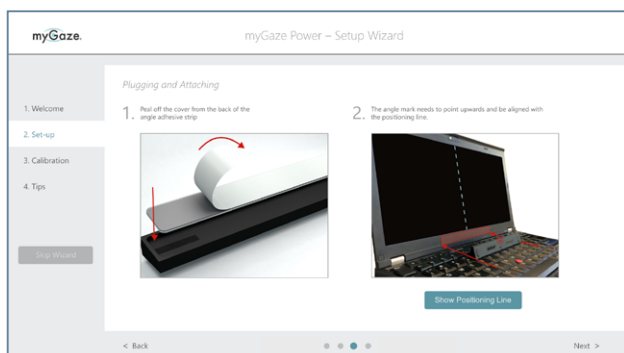

Live – enjoy music and video, play games with family, read electronic books, blog and do so much more.

Zoom – with the new Zoom function, the eye gaze user can now click on any on screen feature, however small, with pixel point accuracy and ease.

Keyboard – the Keyboard is always one click away. It positions itself conveniently on the screen and makes typing easy and quick with word prediction for many languages.

Start Wizard – the new Start Wizard makes it easy for those with little technical knowledge to setup the myGaze with confidence.

AAC – fully integrated with state of the art speech generation devices such as the Grid Pad from Smartbox.
